

**REMARKS**

The present Amendment deletes a limitation from independent claim 7, which now no longer provides that the second color filter must be directly adjacent the reflective layer and the first color filter. The arguments presented on behalf of claim 7, on pages 13 and 14 of the Amendment filed December 6, 2005, should be considered with the modified claim language in mind.

In reply to the requirement for an election of species, in the Office Action dated February 28, 2006, Applicants hereby elect species (B). Claims 7-11 and 17-20 read on the elected species.

Reconsideration of this application in view of this election is respectfully requested.

Respectfully submitted,
